

RAJGURU CHIWATE

B.Tech AI & ML | AI/ML & Full-Stack Developer

rajguruchiwa@gmail.com | +91 9960887431 | [GitHub](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

Third-year B.Tech Artificial Intelligence & Machine Learning student at Universal AI University with hands-on experience in full-stack development, UI development, and practical AI systems. Experienced in building AI-enabled applications and machine learning solutions using Python, React, and computer vision workflows. Interested in deep learning, neural network architectures, and agentic workflows, with a focus on simplifying repetitive tasks and automating manual processes through intelligent software solutions.

TECHNICAL SKILLS

Languages: Python, C++, C, JavaScript

AI / ML: Machine Learning, Deep Learning, Neural Networks, Reinforcement Learning, Computer Vision, TensorFlow, Scikit-learn

Data: NumPy, Pandas

Full-Stack / UI: React.js, HTML, CSS, Tailwind CSS, Firebase, Firestore

Databases / APIs: MySQL, MongoDB, Google Drive API

Tools: Git, GitHub, VS Code, Jupyter Notebook, Google Colab, Figma

EDUCATION

Universal AI University, Karjat — B.Tech, Artificial Intelligence & Machine Learning | 2024–2028 | CGPA: 8.2/10

Sanjay Ghodawat IIT Academy — 12th / Higher Secondary | 68%

PROJECTS

Flowgen — Content Workflow & Asset Management Platform | *React, Vite, Tailwind CSS, Firebase, Firestore, Google Drive API*

- Built a Kanban-based content workflow platform covering Idea → Shooting → Editing → Ready → Posted stages.
- Developed drag-and-drop project management, dashboards, inline editing, asset management, and content organization workflows.
- Integrated Firebase Authentication and Firestore for user authentication and persistent project data.
- Integrated Google Drive API for user-owned asset storage while maintaining project metadata in Firestore.

PATH_RL — Reinforcement Learning Path Planning & Pursuit-Evasion | *Python, Reinforcement Learning, PPO/DQN*

- Building a 2D multi-agent evacuation analysis system to study how occupants navigate buildings during emergency scenarios.
- Models crowding, bottlenecks, exit usage, and evacuation behavior for what-if analysis of building layouts and emergency conditions.
- Uses reinforcement learning concepts to model agent states, actions, rewards, and adaptive navigation behavior.
- Designed for scenario testing and evidence-based evacuation planning, with future support for dynamic hazards, heterogeneous agents, and adaptive AI policies.

Aura Alert — IoT Fire Detection & Autonomous Response Robot | *IoT, Sensors, Robotics*

- Developed an IoT-enabled autonomous robot designed to detect fires and evaluate associated risk.
- Implemented automated fire-extinguishing response mechanisms based on detected fire conditions.

LEADERSHIP & ACTIVITIES

TechOps Club, Universal AI University — Digital Head | *Digital Content & Coordination*

- Managed digital content and coordinated online campaigns to promote club activities and engagement.

AI Odyssey Hackathon, Universal AI University — Operations Team Lead / Co-organizer | *Event Operations*

- Supported event operations and coordination for the university AI Odyssey hackathon.

ACHIEVEMENTS

- 2nd Place — Inter-College Research Poster Presentation, during International Academic Exchange Semester, South Korea.
- 3rd Place — Korea × Japan GDGoC Hackathon: The Bridge 2026, Korea University, Seoul.
- International Academic Exchange Program — South Korea, 2026.
- Verified Certificate — Carbon Capture and Storage, EdinburghX (edX).
